PROBLEM STATEMENT

AtliQ Hardware has expanded its operations globally and recently opened its own stores in Latin America. However, these stores are incurring **significant losses.**

A detailed review revealed that the decision to open these stores was based on **general industry surveys and management intuition**, rather than data-driven analysis.

To address this, AtliQ Hardware has decided to establish a **dedicated Data Analysis team.** All future business decisions will be based on **data and insights,** enabling the company to respond effectively to competitors and drive sustainable growth.
